Forecast for Friday 09 Dec 2022

Weather: Rather cloudy with a few snow showers at first but cloud clearing from the north, perhaps a few low level mist or freezing fog patches developing. Then a frosty start to a dry bright day with some good spells of sunshine. Western hills expected to become cloudier in the afternoon with a few mainly light snow showers possible.

Chance of cloud-free hill tops above 600m: Close to 100%, falling to around 60% in the afternoon in west

Low cloud and visibility: Little or no cloud expected below the summits through the morning but occasional or periods of cloud developing over western hills in the afternoon. Away from cloud visibility very good or excellent but a kilometre or less in any early low level mist and freezing fog and perhaps briefly in any snow showers.
